SUBJECT INDEX, VOLUME XXXV

Allyl acetate, graft copolymers with polystyrene, 343
ε-Aminocaproic acid, polyamides from, 277
Anionic polymerization, styrene, 259
Arachin, denaturation, 465
Atactic polystyrene, dynamic mechanical behavior, 281
Birefringence, polyethylene terephthalate fiber, 543
3,3-Bis(chloromethyl)oxacyclobutane, polymerization, 275
ε-Caprolactam, non-hydrolytic polymerization, 119
Catalyst, $TiCl_3$-AlR_3, 559
Cellulose, changes in fine structure of fibers during acid hydrolysis, 93
  hydrogen bonds in, 529
  separation of gel particles from, 280
  x-ray small angle scattering, 139, 145
Chains, dimensions in solution, 553
Chromatography, precipitation, fractionation by, 409
Condensation polymerization, kinetics, 301
Degradation, of natural rubber, 267
  polyvinyl chloride, 3
Dextran, molecular weight and branching, 167
  molecular weight and kinetics of formation, 191
  rearrangement by branching, 183
Dialdehyde starch, solution properties, 31
Dialkyldithiophosphates, metal, as retarders of natural rubber degradation, 267
Diffusion, keratin, 535
Dimethyl maleate, graft copolymers with polystyrene, 343
Dynamic mechanical behavior, polystyrene, 281
Electrolytes, inorganic, effect on denaturation of arachin, 465
Emulsion polymerization, styrene, 423
Enzymatic polymerization, 167, 183, 191
Ethylene, thermal polymerization, 547
Fluorine, in polymers, glass transition temperatures, 555
Fractionation, graft polymers, 558
  polyethylene terephthalate, 309
  polyvinyl acetate and polyvinyl alcohol, 321
  by precipitation chromatography, 409
Gamma irradiation, rubber and styrene, 17
Glass transition temperatures, fluorine-containing polymers, 555
Graft copolymers, polyester-vinyl, 536
  polystyrene with dimethyl maleate and with allyl acetate, 343
Graft polymer, formation, 17
  solution and fractionation properties, 558
Hydrogen ion catalysis, mechanism in esterification, 219
Infrared spectra, pentane-2,4-diol, 295
Initiation, by tetramethylthiuram disulfide, 313
Isotactic polystyrene, dynamic mechanical behavior, 281
  light scattering, 205
  preparation, 381
Keratin, stress relaxation and diffusion, 535
Kinetics, anionic polymerization of styrene, 259
  condensation polymerization, 301
  dextran formation, 191
  sorption, recording apparatus for, 335
Light scattering, calibration of photometer, 549
  isotactic polystyrene, 205
Microscopy, optical, for localization of active sites, 559
Molecular weight, dextran, 167, 191
  Graham's salt, 235
Osmotic balance, 271
Pentane-2,4-diol, infrared spectra, 295
Phase equilibria, in ternary systems, 507

Phosphorus, in polymers, 540
Polyacrylates, high-energy radiation effects on, 369
Polyamides, acid hydrolysis, 277
molecular motion, 77
Polyampholytes, potentiometric behavior, 43
cis-1,4-Poly-(2,3-dimethyl-1,3-butadiene), 533
Polyelectrolytes, inorganic, 235
ultrasonic velocity and adiabatic compressibility in, 429
Polyester-vinyl graft copolymers, 536
Polyethyl α-chloroacrylate, lactonization, 519
Polyethylene, blends with polyisobutylene, x-ray diffraction study, 531
crosslinking with high-energy electrons, 557
solution studies, 71
Polyethylene terephthalate, fiber birefringence, 543
fractionation, 309
Polyethyl methacrylate, shear modulus and internal friction, 273
Polyisobutylene, blends with polyethylene, x-ray diffraction study, 531
Polymers, linear, equation of state in monolayers, 401
Polymethacrylates, high energy radiation effects on, 369
Polymethyl methacrylate, shear modulus and internal friction, 273
Polypropylene, permeability to gases and vapors, 285
Polystyrene, atactic and isotactic, dynamic mechanical behavior of, 281
graft copolymers with allyl acetate, 343
graft copolymers with dimethyl maleate, 343
influence of velocity gradient on viscosity, 441
isotactic, light scattering, 205
isotactic, preparation, 381
viscosity, 299
Polyvinyl acetate, extraction fractionation, 321
vapor pressure, 489
Polyvinyl alcohol, crystalline, normal vibrations of, 303
extraction fractionation, 321
infrared spectra, 295
intra- and intermolecular hydrogen bonds in, 288
vapor pressure, 497
Polyvinyl chloride, degradation and stabilization, 3
Proteins, of *Arachis hypogaea*, 475
Radiation, for crosslinking polyethylene, 557
for crosslinking rubber, 541
effects on polyacrylates and polymethacrylates, 369
Resins, thermosetting, globular formations in, 391
Rubber, crosslink wandering at high temperatures, 113
γ-irradiation, 17
natural, degradation, 267
radiation crosslinking, 541
Second virial coefficient, polymer solutions, 247
Shear modulus, polymethyl methacrylate and polyethyl methacrylate, 273
Starch, dialdehyde, solution properties, 31
Stress relaxation, keratin, 535
Styrene, anionic polymerization, 259
emulsion polymerization, 423
γ-irradiation, 17
Tetramethylthiuram disulfide, initiation by, 313
Thermal diffusion, high polymer solutions, 308
Thermal polymerization, ethylene, 547
Ultrasonic velocity, in polyelectrolyte solutions, 429
Vapor pressures, polymer solutions, 489, 497
Vinyl benzoate, copolymerization, 292
Vinyl polymerization, 268
N-Vinylurethane, copolymerization, 215
Viscosity, influence of velocity gradient on, 441
polystyrene, 299
X-ray, diffraction study of polyethylene-polyisobutylene blends, 531
small angle scattering of cellulose fibers, 139, 145
